SUMMARY

Software Development Engineer with 4+ years of experience building scalable full-stack and backend applications using React.js, Angular, Node.js, TypeScript, Express.js, and MongoDB. Experienced in designing microservices, RESTful APIs, real-time systems, and third-party integrations. Hands-on experience with Docker, Kubernetes, AWS, Azure, Redis, and distributed systems, with a strong focus on performance, scalability, and clean architecture.

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, C#, HTML5, CSS3

Frontend: React.js, Angular, Next.js, Redux, Tailwind CSS, Bootstrap, WebRTC

Backend: Node.js, Express.js, NestJS, REST APIs, GraphQL, Microservices, MVC, Clean Architecture, Socket.IO, WebSocket, RabbitMQ, Node-RED

Databases & Storage: MongoDB, PostgreSQL, TimescaleDB, Redis, AWS S3

Cloud & DevOps: Docker, Kubernetes, Azure, Azure AKS, AWS EC2, Nginx, Jenkins, Git, GitHub, CI/CD

Tools: Postman, Swagger, Figma, VS Code, Cursor, Claude Code, Jira

Streaming & Integrations: RTSP, HLS, FFmpeg, REST API Integration, Third-Party SDK Integration, Event-Driven Systems

WORK EXPERIENCE

Software Development Engineer (Client: NXGEN Technology AG)

March 2025 – Present

Ethereal Covenant

Bengaluru, Karnataka

- Developed and enhanced modules for the **NXGEN GCX** platform, integrating multiple video surveillance and security systems including Ajax, Hikvision, Dahua, Vivotek, ENEO, Hanwha, and Dahua Cloud.
- Designed and maintained scalable backend services using **Node.js, TypeScript, Express.js, MongoDB, Redis, RabbitMQ, and Node-RED** to support real-time event ingestion, device communication, and distributed system workflows.
- Implemented features for **live streaming, playback, RTSP/HLS video streaming, event processing, snapshot generation, clip downloads, and camera audio controls**, while troubleshooting complex cloud and on-premise device integrations.
- Built a production-grade Hikvision clip download pipeline using ISAPI, RTSP fallback, FFmpeg remuxing, and AWS S3 upload, improving reliability across multiple NVR deployments.
- Designed a **TimescaleDB** schema for time-series event and clip-download logging with automated retention policies, enabling scalable monitoring and audit capabilities.
- Collaborated with QA teams, product managers, and third-party vendors to troubleshoot production issues, optimize application performance, and deliver production-ready features in Agile environments.

MERN Stack Developer

October 2021 – February 2025

Tenor Hut

Ernakulam, Kerala

- Designed and developed full-stack web applications using **React.js, Node.js, Express.js, MongoDB, and TypeScript**, delivering scalable and maintainable solutions for multiple client projects.
- Built reusable UI components, secure authentication systems, RESTful APIs, and responsive interfaces, ensuring seamless user experiences across desktop and mobile devices.
- Optimized backend services, database queries, and application performance while integrating third-party APIs and implementing role-based access control for enterprise applications.
- Collaborated with clients and cross-functional teams to gather requirements, develop new features, resolve production issues, and deploy scalable applications following Agile methodologies.

EDUCATION

APJ Abdul Kalam Technological University

Bachelor of Technology (Mechanical Engineering)

Ernakulam, Kerala

2015 – 2019
